2. Bind Thermosat to APP
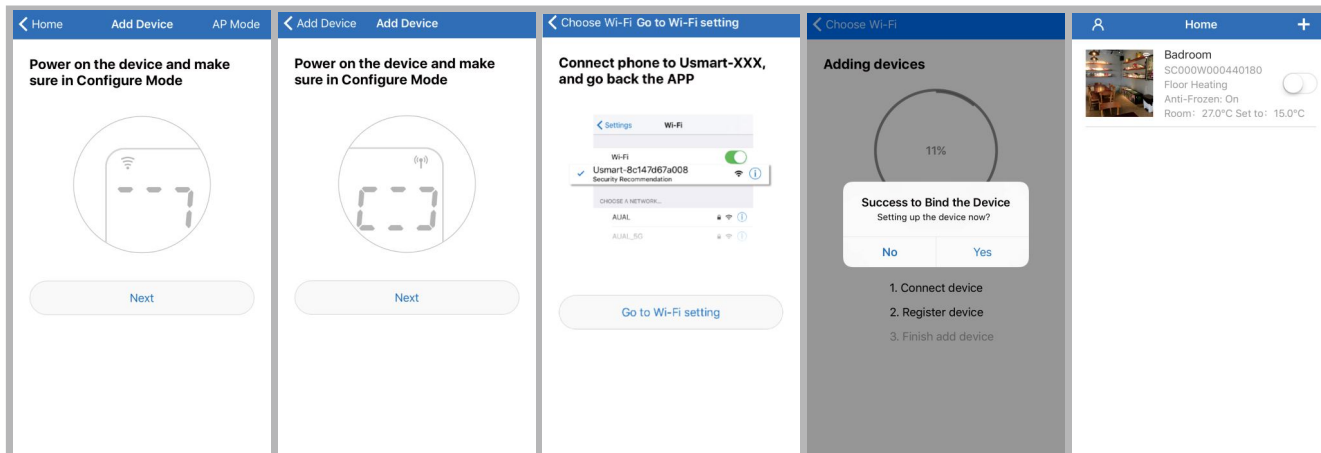

Follow the configuration wizard in the app to finish Wi-Fi and App connection. Two configuration modes are provided: normal mode and AP mode.

① Make sure that your mobile phone is connected to a 2.4GHz Wi-Fi network. Then tap **+** to add your thermostat device to U-Smart app.

② Shut down your thermostat and long press the ✎ key to enter normal Wi-Fi setting mode. Then tap **Next** in the following interface.

③ Enter the password of the 2.4GHz Wi-Fi network that your mobile phone is connected to and tap **Next**.

④ Wait for a while and your thermostat device will be bound. Then you can set the nickname and icon for this device.

⑤ The thermostat will be added to the home interface.

Floor Heating
Anti-Frozen: On
Room: 27.0°C Set to: 15.0°C

If the normal mode fails, follow the steps below to try again via AP mode.

① Tap **AP Mode** in the top right corner.

② Shut down your thermostat and long press the 🍃 key for two times to enter AP Wi-Fi setting mode. Then tap **Next** in the following interface.

③ Tap **Go to Wi-Fi Setting** and connect to the Wi-Fi network named **Usmart-XXX**. Then go back to the app.

④ Wait for a while and your thermostat device will be bound. Then you can set the nickname and icon for this device.

⑤ The thermostat will be added to the home interface.

3. Share Thermostat

Share the permission of thermostat to your family or friends by QR code. For example, Phone A shares the permission to Phone B.
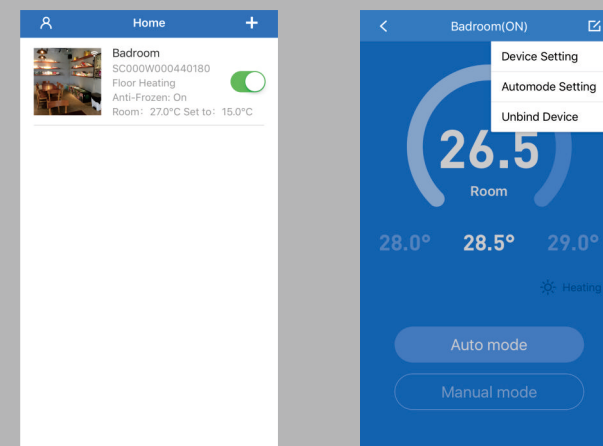

① Tap 👤 in the top left corner.

② On Phone A, tap **Share** and on Phone B, tap **QR Code**.

③ On Phone A, select the devices you want to share with, and tap **Share**.

④ Use Phone A to scan the QR Code of Phone B.

⑤ Wait for a while and the control permission will be shared successfully.

4. Manage Thermostat via U-Smart APP

The following introduces the interfaces of U-Smart app.

① Home Interface
Tap the switch to turn on or off your thermostat. Tap the icon of the thermostat to enter the configuration interface.

② Temperature Setting Interface
You can slide the bar to set temperature, select Auto or Manual mode, and tap 📝 to get more advanced settings.

③ Device Setting Interface
In this interface, you can view device type and device ID, and you can set device tag, device icon and the Anti-Frozen Protection function.

④ Automode Setting Interface
In this interface, you can configure the weekly programing function.
