

KNX RGBW LED Controller

09.912FA.04722

Important: Read All Instructions Prior to Installation

Function introduction

Product Data

| No. | Input Voltage | Output Current | Output Power | Remarks | Size(LxWxH) |
|-----|---------------|----------------|---------------|------------------|---------------|
| 1 | 12-36VDC | 4x5A | 4x(60-180)W | Constant voltage | 170x53.4x28mm |
| 2 | 12-36VDC | 4x350mA | 4x(4.2-12.6)W | Constant current | 170x53.4x28mm |
| 3 | 12-36VDC | 4x700mA | 4x(8.4-25.2)W | Constant current | 170x53.4x28mm |

The dimmer with LED constant voltage drive can drive LED directly, has four channels, each channel is independent.

The output can connect with some big power dimmable LED lights. These LEDs can be switched, dimmed, recall scene or other operations via the bus.

The devices adopt PUSH terminals to achieve electrical connection; the connection to the EIB/KNX bus is established via a bus connecting terminal. The input need connect a 12V-36V DC operation voltage. The following list provides a functional overview:

- ☆Switching the LED light
- ☆Relative dimming
- ☆Absolute dimming
- ☆Status report, error report
- ☆Setting 15 scenes
- ☆Staircase lighting function
- ☆Bus recovery (or reset) function
- ☆Preset value and modify preset value functions
- ☆Switch/relative dimming via manual buttons

The above function of parameters to configure and use are described in the chapter 5. The device has own database file. There is added a manual operation function in the normal dimming mode, it is invalid in the staircase lighting mode. Switch via a short operation of manual buttons, relative dimming via a long operation, and in the case of the bus voltage fail the manual operation is invalid.

Safety & Warnings

- DO NOT install with power applied to device.
- DO NOT expose the device to moisture.

Technical data

| | | |
|-----------------------|-----------------------|--|
| Power supply | Bus Operating voltage | 21-30V DC, via the KNX/EIB bus |
| | Input voltage | 12-36V DC |
| Output | 4 channels | |
| | Rated current | 5A/350mA/700mA×4 CH |
| | Load voltage | 12-36V DC(constant voltage) |
| | Safety | Short-circuit ,over voltage and over temperature protection |
| Connections | EIB/KNX | EIB bus connection terminal |
| | Inputs/outputs | Using screwless connection terminal |
| Operation and display | Button and red LED | For assigning the physical address |
| | Green LED flashing | Indicate the application layer running normally |
| | LEDs for Output | Indicate output status per channel, LED on mean the channel has output, LED off mean the channel has not output. |
| | Manual buttons | Switch via a short operation, relative dimming via a long operation |
| | OT. LED | Indicate over-temperature, >70 °C |
| | OV. LED | Indicate over voltage, >40V DC |
| Type of protection | IP 20 , EN 60 529 | |
| Temperature | Operation | -5 °C...+45°C |
| | Storage | -25 °C...+55°C |
| | Transport | -25 °C...+70°C |
| Ambient | Humidity | <93%, except dewing |
